

AVAILABILITY AND ORDER MANAGEMENT

Welcome to Michelin System to System Portal
introducing Michelin integration capabilities.
Explore our main features and associated benefits

PROVIDE THE BEST AVAILABILITY RESPONSE AND AUTOMATIZE ORDER PROCESS

Stock Inquiry, Order Creation and **Order Portfolio** allow you to request availability for one or more product, create automatically the order and follow up the desired quantity and date with a status.

Streamline and digitalize your tire ordering process to be more efficient.

OUR RECOMMENDATION

API INTEGRATION

Get immediate availability response and creation of order to secure operations.
Automatize your ordering process by implementing min/max stock levels in your ERP.
Get warned of any event with update of order status via API.

FOR YOUR POINT OF SALES

A FASTER SERVICE...

Available when you need it: open **in** and **out of** office hours.
Checking availability is **4 times faster using System to System than manually checking web site***
You can concentrate on **servicing your customers.**
